

Pantopax™ DSR

Rx

Pantoprazole Gastro-resistant and
Domperidone Prolonged-release Capsules IP

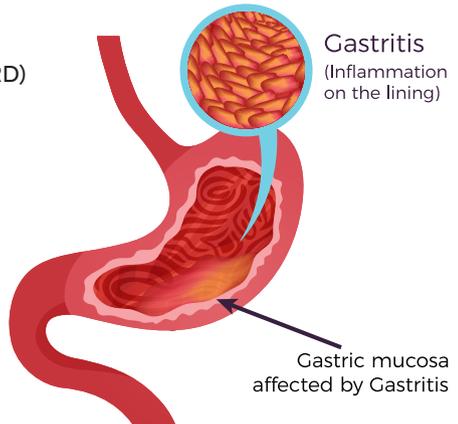

For Acid Reflux & **Upper GI Motility Disorders**

A dual-action combination of pantoprazole and prolonged-release domperidone that provides effective acid suppression while improving gastric motility, offering comprehensive relief in GERD and reflux associated with delayed gastric emptying.

INDICATIONS

- ✓ Gastroesophageal reflux disease (GERD)
- ✓ Acid reflux with nausea and vomiting
- ✓ Functional dyspepsia
- ✓ Delayed gastric emptying
- ✓ Reflux symptoms associated with bloating and fullness

relief from
GERD & HEARTBURN**

Pantopax™ DSR Capsules

Rx

Pantoprazole Gastro-resistant and Domperidone Prolonged-release Capsules IP

Pantopax DSR is a synergistic combination of Pantoprazole and Domperidone, designed to provide sustained gastric acid suppression along with improved gastrointestinal motility. It is indicated in acid reflux conditions associated with delayed gastric emptying, nausea, and regurgitation.

MECHANISM OF ACTION

Pantopax DSR combines acid suppression with motility enhancement:

- **Pantoprazole:** Irreversibly inhibits gastric H^+/K^+ -ATPase, reducing basal and stimulated acid secretion
- **Domperidone (PR):** Enhances gastrointestinal motility and accelerates gastric emptying by peripheral dopamine D_2 receptor antagonism

KEY CLINICAL ADVANTAGES

- Addresses both acid secretion and reflux physiology
- Prolonged-release domperidone ensures sustained action
- Reduces recurrence of reflux symptoms
- Suitable for patients with GERD plus dysmotility
- Once-daily dosing improves adherence
